# Flavor Find Website: Figma Prompt Pack

Design prompts for every page of the consumer website | Draft v1 | November 2026 | Nairobi, Kenya | Confidential

## 0. How to use this pack

1. **Upload the logo first.** Attach your logo file (the gold chef hat with the magnifying glass) to the Figma file. Every prompt tells Figma to use it exactly as supplied. Never let the tool redraw it.
2. **Run Prompt 00 (Design System) first.** It creates the colours, type, components and motion rules every page reuses. Review it, fix it, and only then continue.
3. **Then run one page prompt at a time**, each on its own Figma page. Paste the **Brand header** (section 1) at the top of every prompt so the tool keeps the same look. Each page prompt already asks for desktop (1440), tablet (834) where useful, and mobile (390) frames, plus the important states.
4. **Review each page with the checklist in section 21** before moving on.
5. If the tool cuts off a long prompt, paste it in two halves (the prompts are written in numbered sections so they split cleanly).

The page numbers match the website plan (section 5 of the Plan and Documentation), so a design and its specification always share a number.

**A note on colour:** the hex values below were read from the logo artwork in your documents. Open your logo file and sample the exact green and gold with the eyedropper, then update the tokens once in Prompt 00. Everything else follows.

# 1. Brand header (paste at the top of every prompt)

```
Project: Flavor Find, a Kenyan food-discovery website and PWA. Tagline: Find the flavor. Fill the table.
Logo: use the attached logo exactly as supplied (gold chef hat with a magnifying glass). Do not redraw, recolour, stretch or add effects. On deep green use the gold logo. On cream place the logo on a deep green rounded square.
Palette: Forest green #25423A (primary), Deep green #1B3029 (dark surfaces), Gold #D1AE5F (accent, only on dark green or as fine detail), Cream #F7F2E7 (page background), Mist #E8EEE9 (cards and rows), Ink #1C2B26 (text), Sage #6B7A72 (secondary text), Chili #B9472F (warnings and the Almost tier, used sparingly).
Type: Fraunces for display and headings, Inter for interface and body.
Style: modern, clean, premium, warm. Generous white space, very large type, soft rounded corners (16 and 24), thin 1 px Mist borders, very soft green-tinted shadows, one accent at a time. Food photography in natural light. Until real photos exist, use soft green duotone placeholders with fine gold line illustrations of ingredients (pot, spoon, chilli, leaf, grain, fish).
Tone: warm, confident, Kenyan, short sentences. Swahili appears as a quiet secondary label.
Frames: Desktop 1440, Tablet 834, Mobile 390. 12 column grid on desktop with 1200 max content width, 4 column grid on mobile with 20 px margins. 8 px spacing system. Use auto layout, components and variables everywhere. Name all layers clearly. No lorem ipsum: use the real copy given.
```

# 2. Prompt 00: Design system

```
[Paste the Brand header]

Create the Flavor Find design system as a Figma file with three pages: Foundations, Components, Patterns.

FOUNDATIONS
1. Colour variables. Primitives: the eight palette colours above plus tints (Gold 100 #F1E4BF, Chili 100 #F4DCD3, Green 100 #DDE7E1). Semantic variables: bg/page (Cream), bg/surface (white), bg/muted (Mist), bg/inverse (Deep green), text/primary (Ink), text/secondary (Sage), text/inverse (Cream), border/subtle, brand/primary (Forest), brand/accent (Gold), state/success, state/warning, state/error, tier/exact (Forest bg, Cream text), tier/can-make (Gold 100 bg, dark gold text #4A3A10), tier/almost (Chili 100 bg, text
```

#8A3A26), badge/plus (Gold bg, Deep green text). Provide Light and Inverse modes.
2. Spacing 4, 8, 12, 16, 24, 32, 48, 64, 96, 128. Radius 8, 12, 16, 24, 999. Shadows sm, md, lg, all soft and green tinted.
3. Text styles. Display XL 72/76, Display L 56/60, H1 44/48, H2 32/38, H3 24/30 (Fraunces Semibold). Body L 18/28, Body 16/24, Small 14/20, Caption 12/16, Label 13/16 uppercase +4% tracking, Number tabular (Inter). Mobile sizes about 25% smaller.
4. Grid and layout page: desktop 12 column, tablet 8 column, mobile 4 column, with example section spacing (96 desktop, 56 mobile).
5. Iconography: 24 px grid, 1.5 px rounded line icons in the style of Lucide, plus custom food icons (pot, spoon, chilli, leaf, fish, grain, basket, plate).
6. Logo page: clear space equal to the height of the chef hat, minimum sizes, dark and light lockups, a square app icon on deep green.
7. Imagery page: warm natural light, overhead table scenes, steam, hands, textured cloth, matte colours, Kenyan dishes. Placeholder style: Forest green duotone with a gold line illustration.

COMPONENTS (each with variants and the states default, hover, pressed, focus, disabled, loading)
- Buttons: Primary (Forest), Primary on dark (Gold), Secondary (outline), Ghost, Icon button; sizes L, M, S.
- Navigation: desktop header light, desktop header transparent on dark, header scrolled (shrunk), mobile header, mobile bottom tab bar (Cook, Pantry, Saved, Counties, Me), language switch EN | SW, avatar menu.
- Ingredient chip: resolved, spelling corrected (small note), ambiguous (gentle pulsing ring), removable, locked diet chip.
- Ingredient input: large pill with autocomplete dropdown (suggestions with English and Swahili names).
- Tier badges: Exact, Can make, Almost. Quality badges: Verified, Reviewed. Plus badge. Diet tags.
- Dish card: grid, horizontal list and compact variants. Image slot 4:5 with a placeholder fallback, heart button, name with Swahili name beneath, tier badge, one line of matched and missing ingredients, region tag.
- County tile (with and without a story), Story card (tall).
- Pairing card with strength dots (1 to 5) and a type label (Side, Drink, Dessert).
- Substitution row with grade (Great, OK, Emergency with warning icon).
- Ingredient row by role, Step item with large numeral.
- Form fields: text, password with strength, phone with +254, select, stepper, toggle, checkbox, radio, segmented control, OTP boxes.
- Tabs, accordion, toast, modal, bottom sheet, Plus paywall sheet, skeleton

```
blocks, empty state, banner (offline, estimates, allergen note), consent
banner, footer, avatar, progress stepper, countdown ring.

PATTERNS
- Plus paywall pattern: preview visible, one calm sheet with the benefit,
price and a button.
- Allergen and estimates note pattern (always visible under results).
- Error pattern with a small Reference line for support.
- Loading, empty and error pattern for every list.

MOTION (document as annotated prototypes)
Durations 120, 240 and 400 ms. Easing cubic-bezier(0.22, 1, 0.36, 1). Chip
pop in (scale 0.9 to 1). Cards rise 16 px and fade with a 60 ms stagger. Hero
parallax up to 24 px. Page transitions are a soft fade. Provide a reduced
motion alternative for each.
```

## 3. Prompt 01: Home

```
[Paste the Brand header]

Design the HOME page. Frames: Desktop 1440, Mobile 390. Also make three hero
variants: (A) empty, (B) with two ingredient chips added, (C) with live
results.

Experience goal: a visitor should feel they walked into a beautiful
restaurant, then immediately want to try it.

1. HERO, deep green, full viewport height.
- Header: logo left, links Cook, Counties, Pantry, Plus, language EN | SW,
ghost Sign in, gold Get started.
- Headline in Display XL cream, with the word tonight in gold: What’s in your
kitchen tonight?
- Subhead: Tell us what you have. We’ll show you what Kenya cooks with it.
- A large cream pill input (72 px tall) with a gold plus button and the
placeholder Try: nyanya, vitunguu, maize flour. Below it five suggestion
chips: Tomato, Sukuma wiki, Beans, Eggs, Rice.
- Atmosphere: fine gold line illustrations of ingredients drifting slowly
around the headline, and a warm food photo placeholder plate on the right,
partly cropped. Three dish cards peek up from the bottom edge and fill with
real results as chips are added.
- A small scroll cue.
```

2. LIVE RESULTS strip (cream): label Ready to cook with what you have, then a horizontal row of dish cards with tier badges.
3. HOW IT WORKS: three large numbered steps with line illustrations. 1 Tell us what you have. 2 We match it, strictly. 3 Cook it, then see what pairs. Each step reveals on scroll.
4. TRUST BAND, deep green. Headline: Tomato means tomato. Body: Type tomato and you get dishes that need only tomato, never a chicken stew in disguise. Want more? Switch to Explore and see what's one ingredient away. Left: a Strict | Explore toggle with two example cards. Right: four numbers in large type: 300 Kenyan dishes, 878 ingredients, 1,498 local names, English and Swahili.
5. TASTE OF 47 COUNTIES: heading Taste of 47 Counties, subhead One signature dish and story from every corner of Kenya. A horizontal scroller of tall story cards (5 live, then soft Coming soon cards) and a link Explore the map. A small Kenya outline as a decorative detail.
6. PERFECT PAIRS: a split layout showing Ugali + Sukuma wiki = A classic, with a strength indicator of 5 out of 5, and carousel dots to Nyama choma + Kachumbari.
7. PLUS TEASER on a Mist card: four icons with labels (Weekly meal plans, Budget mode: What can I cook with KES 300?, Offline recipes, No ads), the line From KES 199 a month (placeholder), and the button See Plus.
8. COMMUNITY: a warm photo placeholder of hands cooking and the headline Mama's recipe belongs here, with the button Share a recipe.
9. FINAL CALL TO ACTION, deep green: Find the flavor. Fill the table. with the button Start cooking.
10. FOOTER: a very large Flavor Find wordmark in gold, link groups Product (Cook, Counties, Pantry, Plus), Company (About, Help, Contact), Legal (Privacy, Terms, Estimates and allergens), language switch, social icons, a WhatsApp link.

Mobile: the hero fills the screen, the input is full width, chips scroll horizontally, sections stack, the Taste of 47 Counties scroller swipes.

Prototype: focusing the input expands it, adding a chip pops it in and raises matching cards, scrolling reveals each section with the card rise motion.

# 4. Prompt 02: Cook (find dishes)

```
[Paste the Brand header]

Design the COOK page, the core of the product. Frames: Desktop 1440 and Mobile 390 for each of these states: (A) empty with starter packs, (B) ambiguity sheet, (C) strict results, (D) explore results, (E) zero results, (F) loading skeletons, (G) engine unavailable.

Desktop layout: light header. Two columns. Left, a sticky builder panel 420 px wide. Right, the results.

BUILDER PANEL
- Title: Your ingredients. The big ingredient input with autocomplete.
- Ingredient chips in three visual states: understood (solid), spelling corrected (small note: we read tomatos as tomato), ambiguous (gentle pulsing ring, tap to choose).
- Hint under the input: Quantities are ignored. Two tomatoes counts as tomato.
- Note: Water, salt and cooking oil are assumed. Change.
- Segmented control: Strict | Explore, with the helper text Explore shows dishes that are one ingredient away.
- Filters: Region dropdown and Meal type chips.
- Signed in only: a locked row Using your diet: Vegetarian · No peanuts with an Edit link, and a secondary button Use my pantry.

RESULTS
- Summary line: 12 dishes you can cook now.
- Sections with their badges: Exact (Forest), Can make (Gold tint), Almost (Chili tint, Explore only).
- Dish cards in a 3 column grid: image slot with placeholder, name, Swahili name, region tag, matched ingredients, a heart. Almost cards show You also need: onion and a small substitution hint such as Spring onion works instead (Great).
- A Why this match expander showing Matched, Missing, Unused and Assumed ingredients.
- A pinned note under the results: Estimates and allergen notes are a guide. Always check with the cook or the label.
- Load more button.

STATES
(A) Empty: a friendly prompt and three starter packs as cards: Githeri kit, Ugali night, Chapati and beans.
```

```
(B) Ambiguity sheet: title ‘Unga’ could mean… with three option cards (Maize flour, Wheat flour, Millet flour) and a link Skip this one.
(E) Zero results: We couldn’t find a match for kienyeji herbs. Try fewer ingredients, or switch to Explore. Button: Tell us about this food.
(G) Engine unavailable: Our recipe brain is resting. Here are your last results, with a Try again button.

Mobile: the builder becomes a top card that collapses to a summary row; filters open in a bottom sheet; a sticky bar reads See 12 dishes; the ambiguity sheet is a bottom sheet.

Prototype: adding a chip updates the result count, tapping an ambiguous chip opens the sheet, switching to Explore reveals the Almost section with a rise animation.
```

## 5. Prompt 03: Dish page

```
[Paste the Brand header]

Design the DISH page. Frames: Desktop 1440, Mobile 390. Extra frames: (A) Cook mode, full screen, (B) low-data version with no image. Use Githeri as the sample dish.

DESKTOP
1. Breadcrumb: Counties / Central / Githeri.
2. Hero split. Left: H1 Githeri, the Swahili name beneath in Sage, tags (Vegetarian, Gluten-free), time 45 min, Serves 4, a Verified badge, region chips. Action row: Save (heart), Add to collection, Mark as cooked, Add to plan (with a small Plus badge), Share to WhatsApp. Right: a large 4:5 image with a 24 px radius (placeholder: green duotone with a gold line illustration of a pot).
3. A sticky side card that appears on scroll: Cook this, a servings stepper and a Start cooking button.
4. INGREDIENTS in two columns: Main and Needed on the left, Optional and Finishing touch on the right. Each row has a tick box I have this, the ingredient name, quantity. A collapsed row Assumed: water, cooking oil, salt. A running line You’re missing 2 with the missing items in Chili.
5. STEPS: large Fraunces numerals, short paragraphs, a button Start cooking mode.
6. PAIRS WELL WITH: three pairing cards (a side, a drink, a dessert) with strength dots and a type label.
```

```
7. SWAP IT: substitution rows, for example Sukuma wiki → Spinach (Great) →
Cabbage (OK) → Kale (Emergency, with a warning icon and a note).
8. NUTRITION AND COST: one card with calories, protein and a cost per serving
in KES, with a clear Estimate chip and the line Estimates only.
9. ALLERGENS AND DIET: a panel listing tags and the standard disclaimer:
Always confirm allergens with the cook or the label.
10. REVIEWS: an average rating, a short list, a Write a review button.
11. RELATED DISHES: a row of four cards.

MOBILE: the image goes full width at the top, ingredients and steps become
collapsible sections, and a sticky bottom bar shows Save and Start cooking.

COOK MODE (A): deep green full screen, Step 3 of 7, giant cream text, a timer
chip, Back and Next buttons, a Keep screen on toggle, and a small ingredient
peek drawer.

Prototype: hearts animate on save, ticking an ingredient updates the missing
line, Start cooking opens Cook mode with a slide transition.
```

# 6. Prompt 04: Taste of 47 Counties

```
[Paste the Brand header]

Design the TASTE OF 47 COUNTIES page. Frames: Desktop 1440, Mobile 390. This is the signature brand page, so it should feel like an exhibition.

1. HERO on deep green. Title in Display XL: Taste of 47 Counties. Subhead: One signature dish and story from every corner of Kenya. A progress ring: 5 of 47 stories told.
2. INTERACTIVE MAP: a large, elegant outline map of Kenya showing the 47 counties in slightly lighter green with thin lines. The 5 counties with stories glow gold. Hover (or tap) shows a floating card: county name, signature dish, a thumbnail and the link Read the story.
3. FILTER PILLS: All, Coast, Central, Nyanza, Western, Rift Valley, Eastern, North Eastern, Nairobi.
4. COUNTY TILES (cream section): a grid of 47 tiles, 4 per row on desktop. Each tile: county name, number, a small line illustration, and a status. Told stories show a gold dot and Read the story. The rest show Story coming soon and a small bell Notify me.
5. FEATURED STORY: one large card with image, title, reading time.
6. NEIGHBOURS STRIP: Uganda, Tanzania, Ethiopia, Somalia, South Sudan as quiet chips, with the line Flavors that cross borders.

MOBILE: the map is smaller above, with a List | Map toggle (List is the default); county tiles become a single column list; filter pills scroll horizontally.

Prototype: hovering a county raises it and opens the card, clicking a gold county goes to the story.
```

# 7. Prompt 05: Story page

```
[Paste the Brand header]

Design the STORY page (a county story). Frames: Desktop 1440, Mobile 390.
Mark all copy as Sample.

1. A thin reading progress bar fixed at the top.
2. Full-bleed hero with a food image placeholder under a deep green gradient.
County chip, title in Display L (Sample: The Dish That Feeds the Mountain),
reading time, author line.
3. Article body in a 680 px column: a large drop cap, comfortable Body L
text, a pull quote in gold Fraunces italic with a thin gold rule, an inline
full-width image with a caption, and two inline dish cards (Signature dishes)
that link to dish pages.
4. A COOK THIS REGION band in deep green: Hungry yet? Cook the flavors of
this county. Button: Cook this region.
5. Next story card with a large image, and a share row (WhatsApp first, Copy
link).

Mobile: single column, drop cap kept, pull quote full width, sticky share
button.
```

# 8. Prompt 06: Pantry

```
[Paste the Brand header]

Design the PANTRY page (signed in). Frames: Desktop 1440, Mobile 390, plus
(A) empty with starter packs, (B) ambiguity sheet.

1. Title: My pantry. Subtitle: Everything you have. We'll cook from it.
2. A wide add bar with autocomplete, same component as Cook.
3. Ingredient chips grouped by category with a small remove icon: Vegetables,
Grains and flours, Legumes, Meat and fish, Dairy and eggs, Spices and
seasonings, Oils and sauces, Other. A count per group.
4. A sticky right card on desktop: Cook with this pantry, 14 ingredients,
button See dishes.
5. A note: Water, salt and cooking oil are assumed. Change.
6. EMPTY STATE: a warm illustration of an open pantry and three starter packs
(Githeri kit, Ugali night, Chapati and beans) that add several chips at once.

Mobile: the sticky card becomes a bottom bar; adding is a full-width input at
the top.

Prototype: removing a chip animates out with an Undo toast.
```

# 9. Prompt 07: Saved, Collections and Cooked

```
[Paste the Brand header]

Design MY COOKBOOK (signed in). Frames: Desktop 1440, Mobile 390.

1. Title: My cookbook. Tabs: Saved, Collections, Cooked.
2. SAVED: filter chips (All, Dinner, Quick, Vegetarian) and a grid of dish cards. Plus members see a small Available offline badge on each card. Free members see a gentle banner when near the limit: You’ve saved 20 of 20. Go Plus for unlimited. (Sample number.)
3. COLLECTIONS: tiles with a 2 by 2 mosaic cover of dish images, the name and the count, and a New collection tile. A New collection modal with a name field.
4. COOKED: a vertical timeline. Each entry has the date, a dish thumbnail, a short note and a Cook again button. Add a small streak line, for example 4 dishes cooked this month.
5. Empty states for each tab, each with a friendly line and a button to Cook.

Mobile: tabs scroll, grids become two columns, collections become a horizontal scroller.
```

## 10. Prompt 08: Meal planner (Plus)

```
[Paste the Brand header]

Design the MEAL PLANNER (Plus). Frames: Desktop 1440, Mobile 390, plus (A)
free preview with the Plus sheet.

1. Header: Week 45, 2 to 8 Nov with previous and next arrows and a This week
button.
2. A 7 column grid (Mon to Sun) by 3 rows (Breakfast, Lunch, Dinner). Empty
slots show a quiet + Add. Filled slots show a small dish chip with a
thumbnail and name.
3. A right panel Add a dish with tabs Saved, Suggestions, Search, and a
prominent button Fill gaps from my pantry.
4. A summary card: 14 dishes planned, estimated KES 4,200 with an Estimate
chip, and the button Make shopping list.
5. FREE PREVIEW (A): the same page with a sample plan, slightly blurred, and
the Plus sheet on top: Plan your week with Plus. Meal plans, shopping lists,
budget mode, offline recipes. Button: Go Plus. Link: Maybe later.

Mobile: horizontal day tabs, a vertical list of meals for the chosen day,
adding via a bottom sheet.

Prototype: dragging a dish card onto a slot snaps it in with a soft bounce.
```

## 11. Prompt 09: Shopping list (Plus)

```
[Paste the Brand header]

Design the SHOPPING LIST (Plus). Frames: Desktop 1440, Mobile 390.

1. Title: Shopping list, Week 45. A progress line 7 of 23 bought.
2. Items grouped by category (Vegetables, Grains, Meat and fish, Dairy and
eggs, Spices, Other). Each row: a tick box, the name, the quantity, an
estimated price in KES. Items already in the pantry are greyed with the label
In your pantry and a Remove link.
3. A total bar: Estimated total KES 4,200 with an Estimate chip.
4. Actions: Share to WhatsApp (primary), Copy, Print.

Mobile: a sticky bottom total bar with the Share button; ticking an item
strikes it through with a soft animation.
```

# 12. Prompt 10: Budget mode (Plus)

```
[Paste the Brand header]

Design BUDGET MODE (Plus). Frames: Desktop 1440, Mobile 390, plus (A) free
preview with the Plus sheet.

1. Hero: the question What can I cook with KES 300? with a huge editable
amount in Display XL, preset chips (200, 300, 500, 1,000), a servings stepper
and a toggle Use my pantry.
2. Results: meal cards that fit the budget. Each shows a cost per serving
estimate with a small bar against the budget, a Fits your budget badge, the
dish name and time. An Estimate chip is always present.
3. A short note: Prices are market estimates in KES and can vary.
4. FREE PREVIEW (A): blurred results and the Plus sheet with the line Try
budget mode free once a week, or go Plus for unlimited. (Sample, depends on a
backend decision.)

Mobile: the amount input stays at the top; results are a vertical list.

Prototype: changing the amount updates the results with a quick cross-fade.
```

# 13. Prompt 11: Plus

```
[Paste the Brand header]

Design the PLUS page. Frames: Desktop 1440, Mobile 390. The page should feel calm and confident, never pushy.

1. HERO on deep green: headline Your kitchen, planned. Subhead: Meal plans, budget mode and offline recipes, without the ads. A price card on cream: KES 299 a month (placeholder, final price to be confirmed), button Go Plus, line Pay with M-Pesa. Cancel any time.
2. COMPARISON: a clean two column table, Free and Plus. Free: Search, Basic recipes, Limited AI chats, Ads. Plus: Everything in Free, No ads, Weekly meal plans, Shopping lists in KES, Budget mode, Nutrition, Offline recipes, Unlimited AI (marked Coming soon). Use gold ticks for Plus.
3. FEATURE ROWS with line illustrations: Plan your week, Cook on a budget, Cook offline.
4. HOW PAYMENT WORKS in three steps with a phone illustration: Tap Go Plus. Enter your M-Pesa number. Approve the prompt on your phone.
5. FAQ accordion: What happens to my saved recipes? Can I cancel? Is the nutrition exact? (Estimates only.) Which phones work?
6. FINAL CALL TO ACTION: the Plus button again.

Also design the reusable PLUS SHEET (modal on desktop, bottom sheet on mobile) used by every locked feature.
```

# 14. Prompt 12: Checkout (M-Pesa)

```
[Paste the Brand header]

Design the CHECKOUT flow. Frames: Desktop 1440 and Mobile 390 for each step. Keep it minimal, secure and fast.

STEPS (a progress stepper at the top)
1. Confirm: Plus, KES 299 a month (placeholder), what you get in three lines, a Continue button.
2. Your M-Pesa number: a phone field with a +254 prefix, the helper text Use the number registered with M-Pesa, a button Send payment request.
3. WAITING: a phone illustration showing the M-Pesa prompt, a countdown ring from 90 seconds, the text Check your phone and enter your M-Pesa PIN. After 30 seconds a link appears: Didn’t get a prompt? Send again. Never show a spinner without context.
4. SUCCESS: a short, tasteful celebration (soft gold confetti), You’re Plus. Welcome. Buttons: Plan my week and Back to cooking.
5. FAILED and TIMED OUT: a clear reason (Payment cancelled, Not enough balance, No response) in plain words, a Try again button, a link to Help.

A summary card on the right on desktop. A trust row: Paid securely with M-Pesa.

Mobile: full screen, large buttons, the stepper collapses to Step 2 of 4.
```

# 15. Prompt 13: Sign in, Sign up, Verify

```
[Paste the Brand header]

Design the AUTH screens. Frames: Desktop 1440 and Mobile 390 for each: (A) Sign in, (B) Sign up, (C) Sign in with phone, (D) Enter the 6 digit code, (E) Verify your email, (F) Forgot password, (G) error states.

Layout: a split screen. Left half, a deep green brand panel with the logo, a large line illustration and one rotating line (Find the flavor. Fill the table.). Right half, the form on cream. On mobile the panel becomes a short green header.

Copy
- Sign in: Welcome back. Tabs: Email | Phone. Fields, a Forgot password link, Sign in button, a link Create an account.
- Sign up: Let’s get cooking. Name, email or phone, password with a live strength meter and rules, a checkbox I agree to the Terms and Privacy Policy, Create account button.
- Code screen: Enter the 6 digit code we sent to +254 7xx xxx xxx. Six boxes, a Resend in 0:30 timer.
- Verify email: Check your inbox. We sent a link to your email. Buttons: Open mail, Resend.
- Errors, shown inline in Chili: Wrong email or password. That code has expired. Too many tries, please wait a minute.

Keep the form narrow (400 px), roomy and calm.
```

# 16. Prompt 14: Account

```
[Paste the Brand header]

Design the ACCOUNT area (signed in). Frames: Desktop 1440 with a left
navigation, Mobile 390 as a list that opens detail screens.

Navigation: Overview, Profile, Diet and allergens, Devices, Subscription,
Notifications, Privacy and data.

- Overview: avatar, name, a plan badge (Free or Plus), language switch EN |
SW, Sign out.
- Profile: household size stepper, region select, monthly food budget in KES.
- Diet and allergens: multi-select chips (Vegetarian, Vegan, Halal-friendly,
Gluten-free, Dairy-free, Nut-free, Egg-free, Pork-free). A calm safety
callout: These are applied to every search. Always confirm allergens with the
cook or the label.
- Devices: a list with device, place and last active, and a Sign out of this
device button.
- Subscription: plan card, renewal date, Upgrade or Manage buttons, a
receipts list.
- Notifications: a list with unread markers, and toggles for preferences.
- Privacy and data: Download my data (a button with a short explanation) and
Delete my account (a destructive section with a typed confirmation modal:
type DELETE, and a plain explanation of what is removed and when).
```

## 17. Prompt 15: Community (submit a recipe)

```
[Paste the Brand header]

Design the COMMUNITY pages (signed in). Frames: Desktop 1440 and Mobile 390 for each step.

SUBMIT WIZARD with a progress stepper (5 steps) and a Saved draft indicator.
1. Basics: dish name in English and Swahili, region, meal type, servings, time.
2. Ingredients: an ingredient input with autocomplete, each row with a role selector in plain words (Main, Needed, Optional, Finishing touch), a quantity and a unit.
3. Steps: numbered text areas with Add step and drag to reorder.
4. Story and permission: an optional story field, a checkbox I wrote this in my own words, and a short statement of ownership terms.
5. Review and submit.
SUCCESS: Asante! Your recipe is in review. We'll let you know.

MY SUBMISSIONS: a list with status chips (Draft in Mist, In review in Gold tint, Approved in Forest, Not approved in Chili tint with the reason).

Tone: warm and appreciative, like thanking a neighbour for a recipe.
```

## 18. Prompt 16: About, Help and legal pages

```
[Paste the Brand header]

Design the STATIC pages. Frames: Desktop 1440 and Mobile 390 for each.

- ABOUT: a deep green hero (We're documenting the flavors of Kenya.), the story of Flavor Find, three values with icons (Honest, Local, Welcoming), a numbers row (300 dishes, 878 ingredients, 1,498 local names), the Taste of 47 Counties promise, a team placeholder, and a call to action.
- HELP: a search field, FAQ accordions in English and Swahili, a card Chat with us on WhatsApp, and a contact form.
- LEGAL TEMPLATE (Privacy, Terms): a sticky table of contents on the left, long readable text on the right at 680 px, last updated date, a language switch.
- ESTIMATES AND ALLERGENS NOTICE: a short, friendly page explaining that nutrition and cost are estimates and that allergen information is a guide.
```

## 19. Prompt 17: System pages and states

```
[Paste the Brand header]

Design the SYSTEM pages and a states sheet. Frames: Desktop 1440 and Mobile
390.

PAGES (each on brand, each with a way forward)
- 404: a line illustration of an empty pot. This dish isn’t on the menu.
Buttons: Back home, Cook something.
- 500: Something burned. It’s on us. Try again, with a small Reference:
a1b2c3 line.
- Offline: You’re offline. Your saved recipes are still here (Plus), or a
version that nudges Plus for free members.
- Maintenance: We’re adding a pinch of salt. Back soon.
- Session expired: a sheet, Welcome back. Sign in to continue, which returns
the person to where they were.

STATES SHEET: for the dish card list, the pantry, the saved grid and the plan
grid, show Loading (skeleton), Empty, and Error versions. Also show: the
toast set (success, info, error), the consent banner (one line, two buttons),
the install prompt, and the offline banner.
```

## 20. Prompt 18: Prototype flows

```
[Paste the Brand header]

Using the designed pages, connect clickable prototypes (desktop and mobile)
with Smart animate for in-page changes and a soft Dissolve between pages.

Flow A, first-time visitor: Home, add three ingredient chips, see results,
open a dish, start Cook mode, tap Save, the sign-up sheet appears, create an
account.
Flow B, returning cook: Pantry, Cook with this pantry, switch to Explore,
open an Almost dish, see the substitution hint.
Flow C, upgrade: Budget mode (free preview), the Plus sheet, the Plus page,
Checkout step 2, the waiting screen, Success, back to Budget mode unlocked.
Flow D, contributor: Account, Submit a recipe, steps 1 to 5, Success, My
submissions.
Flow E, discovery: Home, Taste of 47 Counties, hover a gold county, Story,
Cook this region.
```

# 21. Review checklist and refinement prompts

### After every page, check

- The logo is exactly as supplied, with the right version on each background.
- Only palette tokens are used. Gold never appears as small text on cream.
- Text contrast meets AA. Touch targets are at least 44 px.
- Every list has loading, empty and error states.
- Swahili labels fit. Swahili strings run about 20 percent longer, so leave room.
- Estimates are labelled Estimate and the allergen note is visible where results appear.
- There is no lorem ipsum, and the real copy from the prompt is used.
- Radii, spacing and type styles come from the system, not one-off values.
- The page looks finished with placeholder images, because dish images arrive later.

### Refinement prompts (use when the result feels generic)

```
Make this feel more premium: increase white space by 1.5 times, reduce the number of colours on screen to Forest, Cream and one Gold accent, make headlines larger and lighter in tone, and remove any borders that are not needed.
```

```
Make this feel more like a food experience: add a large warm food image area, a fine gold line illustration of ingredients as an accent, and make the primary call to action more prominent. Keep the interface quiet around the food.
```

```
Make this more Kenyan and local: use Swahili as a quiet secondary label on food names, show prices in KES, and use warm, friendly copy. Do not use stereotypes or clip art.
```

```
Tighten the mobile version: single column, 20 px margins, 44 px touch targets, a sticky primary action at the bottom, and one idea per screen.
```
